

TRONG PHAN

M.S. Data Science Candidate | Experimentation Analytics

Lawrenceville, GA | (651) 206-4261 | johnphanthe@gmail.com | U.S. Permanent Resident | linkedin.com/in/trongthephan

TECHNICAL SKILLS

- **Languages & Tools:** Python, R, SAS, Excel, FastAPI, Streamlit, scikit-learn, SQLite, Git/GitHub, OpenAI, Anthropic, and Gemini APIs
- **Methods:** Causal inference, geo-experimentation, linear regression, decision trees, random forests, bootstrap resampling, Monte Carlo simulation

EDUCATION

Kennesaw State University

Expected Dec 2027

Master of Science in Data Science and Analytics

Marietta, GA

- Relevant Coursework: Statistical Methods, SAS Programming, Python for Data Science

GPA: 4.00

University of Minnesota - Twin Cities (Carlson School of Management)

May 2022

Bachelor of Science in Management Information Systems

Minneapolis, MN

- Double Major: Supply Chain Operations, Minor: Business Analytics

GPA: 3.87

PROFESSIONAL EXPERIENCE

Ovative Group, LLC

Jun 2022 - Feb 2025

Advanced Analytics Analyst

Minneapolis, MN

- Supported causal-inference and geo-lift analyses across 7+ client accounts by preparing data, running established measurement workflows, validating outputs, and summarizing findings for internal teams.
- Analyzed DMA-level sales variability to help identify suitable markets and testing periods for geo-experiments and estimate how statistical noise affected test requirements.
- Tested and troubleshooted an R-based geo-testing workflow with data science and measurement teams, documenting setup issues and contributing to process improvements.
- Maintained QA guidance and prior case studies to help analysts apply more consistent experimentation procedure

RESEARCH EXPERIENCE

Student Researcher, Data Quality and Survey Methodology Lab

Mar 2026 - Present

- Designed and tested a Python/Streamlit application that uses OpenAI and Anthropic Claude APIs to classify 628 open-ended survey records, incorporate human review, and preserve results for reproducible analysis.
- Developed and validated an interactive benchmarking tool that allows researchers to select OpenAI GPT and Anthropic Claude models, evaluate them on the same human-labeled survey dataset, and compare accuracy, consistency, response time, and cost.

DATA SCIENCE & AI PROJECTS

AI-applied Music Recommender | CodePath Foundations of AI Engineering

Summer 2026

- Designed and validated a music-recommendation workflow, using AI coding tools to implement a FastAPI prototype that combines Gemini preference extraction, TF-IDF retrieval, deterministic ranking, and automated reliability tests.

Student Performance Analytics: Predictive Modeling for At-Risk Identification

April 2026 - May 2026

- Built and compared linear regression, decision tree, and random forest models using data from successive grading periods to predict final grades; identified the earliest reliable intervention point, with the best model flagging 96% of students who ultimately finished at risk.

Environmental Worldview and In-Game Behavior: Statistical Analysis Study

April 2026 - May 2026

- Analyzed survey data from 638 Animal Crossing players in R using Welch's t-tests, linear regression, bootstrap resampling, and Monte Carlo sensitivity analysis; found environmental attitudes associated with conservation behavior, while gameplay frequency better explained resource exploitation.
